

Attorney Docket: 420/50943
PATENT

#5/14
7 24 12
1255

1. (Amended) A sound pressure level calibrator for calibrating a sound pressure level sensor, comprising;

a pistonphone for producing a sound pressure;

and a high-pressure adapter, which is connected to an output of the pistonphone, wherein

the high-pressure adapter includes a $\lambda/4$ resonator to amplify the sound pressure and an expanded adapter opening with a sealing ring for a sound connection to a said sound pressure level sensor to be calibrated.
